 [in/Brandon Li](#)

Experience in many technologies including web development and machine learning. Desire to further pursue projects involving web development.

TECHNICAL SKILLS

Proficient in, Javascript / Node.js, React.js, Git, React Native
Experience with C++, Node.js, Express.js, Socket.js, GraphQL, Java, Linux, Atomic Design, NGINX, SCSS
Familiar with UX Design, UI Design, Python, Machine Learning, PostgreSQL, Amazon AWS, Flutter

INTERESTS

Game Development

I do some game development on my free time as well as compete in game jams at my local city game jam.

Cross Country / Track

Running is one of my favorite sports.

WORK EXPERIENCE

Quality Analyst Supervisor

AnthemGold HERC, Austin TX 12/26/18 - 5/19/19

- Evaluated websites on their efficiency, security, and presentability (UI/UX).
- Inspected websites for bugs, and found solutions to fix websites' bugs. Found security flaws in websites and worked with frontend and backend developers to solve the issues that were present.
- Used Java, SQL, and Selenium.

Junior Full Stack Developer

Kilobyte Virtual Enterprise, Remote 11/19/18 - ongoing

- Facilitated the birth of web applications and brought to completion.
- Maintained and kept multiple websites and applications up to date.
- Designed and developed frontend and backend for clients.
- Used React, React Native, Node.js, Express.js, HTML, and CSS.

PROJECTS

RBX.Bet 2019

A virtual item gambling website. Built an optimized real time socket system with Socket.io. Built a secure API, proxy, and web application which protected the users' credentials.

Used React, Socket.io, Express.js

Crypto Registration App 2019

Solidified frontend and backend experience while developing the applications. Worked on React and Flutter version at the same time and added Google OAuth flow. Created a pipeline for the backend to accept data in a secure manner and stored it in PostgreSQL. Facilitated emails with the Customer.io API.

Used React, Flutter, NGINX, PostgreSQL, Express.js

Rentee 2018

Learned to quickly prototype an application using the Ebay Api and figured out different solutions to the problems I encountered based on marketing and development issues.

Used React Native

Meme.cm 2018

My first React Native project posted on the google play store. Fetched memes from the Reddit api and used in the application to display to users. Created a storage system which stores the memes the person wants to save on the phone.

Used React Native

INDEPENDENT EDUCATION

Udacity Design Sprint Foundations

Coursework in design sprint including many ways to start a design sprint. Used the Design Sprint to kickstart the ideation and development of my renting application. Created MVP of application by the end of the course.
